Stainless Steel Tube Cleaning Brush (SSTB)

Product Name:

SSTB Stainless Steel Condenser Tube Cleaning Brush

Part Number:

Refer to Conco Standard Size Chart for SSTB Tube Cleaners.

Application:

The Conco SSTB is for use on all types of tube materials, and on all types of deposits. It is particularly effective on manganese dioxide, iron, and silica deposits. The SSTB is also effective on all types of obstructions, macrofouling and debris. Used for cleaning of straight condenser or heat exchanger tubes, the SSTB can also be used on tubes with inserts or epoxy coatings. The SSTB will restore the tube surface to its original heat transfer characteristics, while providing absolutely the best protection from under-deposit corrosion!

Description:

Made from stainless steel and featuring over 1,000 contact points, Conco Stainless Steel Tube Cleaning Brushes (SSTB) are uniquely designed for removal of difficult deposits that impede heat transfer efficiency.

- Safe, water powered tube cleaner, do not use air pressure.
- Provides complete I.D. surface coverage.
- Designed to meet tube specifications.
- Color-coded heads to distinguish size.
- Manufactured for a wide range of tube sizes from 5/8" to 1-1/4" O.D. in all BWG's.

Storage Information:

Packaged in plastic bags for long, undeterminable shelf life. Store in a cool, dry area. After use discard or thoroughly wash and air dry.

Auxiliary Equipment Required: Conco Model 200B Pump System complete with water guns, nozzles, and hose.

Determination of Quantity:

The Conco SSTB is good for cleaning 8-12 tubes each depending on the severity of deposits. Simply divide the total number of tubes to be cleaned by eight or twelve. To increase the overall speed of the job, or if planning to clean multiple units, increase the number of cleaners to be used to 25 or 50 percent of the total number of tubes to be cleaned.
